

SHEET METAL STAMPING

As a complement to our machining capability, we offer sheet metal stamping services.

We service the rapidly growing regional automotive parts supplier market. We stamp high tensile strength as well as plain carbon steels.

Our Tool Room & CAD support the Press Shop operations with tool and die design, their timely manufacture and re-sharpening after use.

The press working dies are designed to withstand the rigours of their work environment. Past performance demonstrates that life expectancy of tooling is matched by good results during their regular work cycle. This enables us to have reliability in meeting timely deliveries to our clients.
